Automotive #5

WASTE ANTI-FREEZE DISPOSAL

6 NYCRR Part 362

Waste Anti-freeze disposal.

Proper handling, storage and disposal of waste anti-freeze.

Automotive Department Chairman (629-7272)

As needed

When anti-freeze is drained from automobiles it will be placed in the 55 gallon drum provided labeled, Waste Glycol or Anti-Freeze located in Automotive Laboratory. When the drum is 80% full, the Automotive Technicians will contact the approved anti-freeze disposal/recycling contractor to remove the drum. The Automotive Technician will sign the receipt and maintain the file copy and send a copy to the Director of EHS.

If the Automotive Dept changes vendors, the Director of EHS will be notified to review vendor selection.
